Title: BROMMER'S FLORA

Author: Brommer  
-----

This large tome describes  
most of common plants  
indigenous to Britannia.

...The Greer plant is  
especially fascinating, for  
it spends most of its  
life huddled with its  
leaves wrapped up in a  
tight ball. However, every  
so often, the leaves will  
unfurl, radiating out from  
the stem...

...The Reaper is unique in  
that it is both plant and  
animal. Resembling a large  
tree, the Reaper is able  
capable of self-animation  
as well as self-locomotion.  
Reapers have been known  
to attack those who  
cause harm to their home  
(i.e. the forests), but  
seldom reveal themselves  
otherwise...
